5 AI TOOLS

TO MAKE YOUR FIRST $1M

The Greg Isenberg Cheat Code

MEET GREG (AGAIN)

Greg's one of our favorite guests to jam with.

- He's full of startup ideas
- He runs 5 cash-flowing businesses
- He spends 10 hours playing with new tools every single week

In this guide, he shares 5 kinds of AI tools he thinks anyone can use to get to their first million.

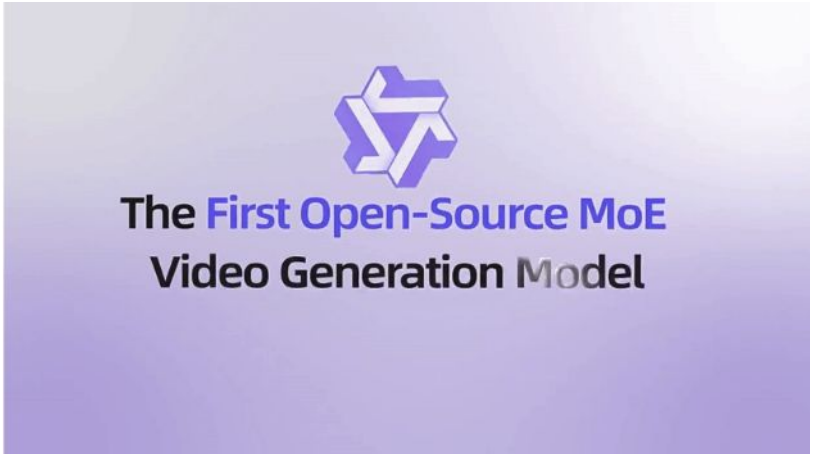

We took notes so you don't have to.

@gregisenberg

1. WAN 2.2

Create deep fake videos of any character (not for evil, ofc)

Wan 2.2 is an open source model by Alibaba that creates deep fake videos using any character.

You can use it to make AI video ads with any character — but ideally those in the public domain, like JFK, Plato.

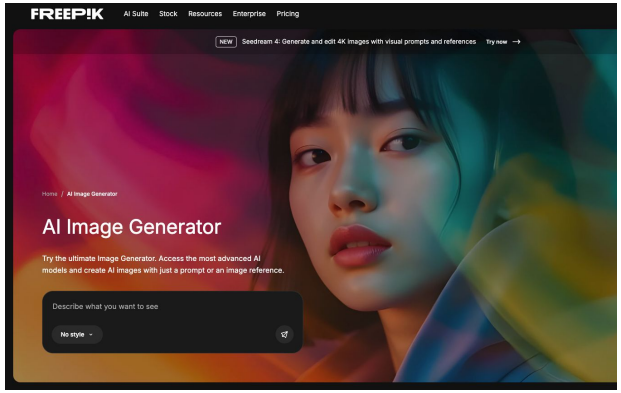

How to Use

- Record yourself speaking
- Pick a character to mirror yourself
- Have fun

ALTERNATIVES

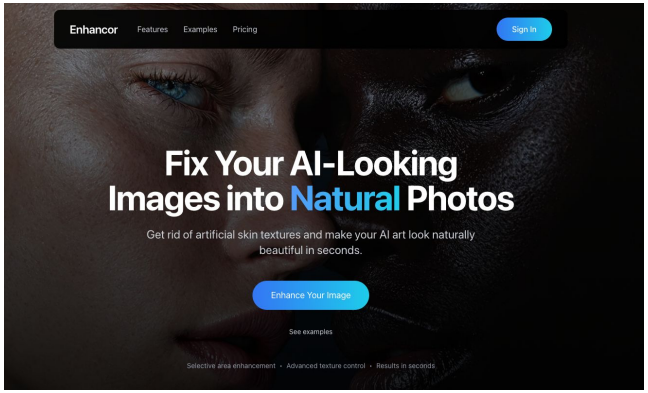

Easier tools to create AI video ads with

Freepik

Selects best image model, references and prompt enhancer

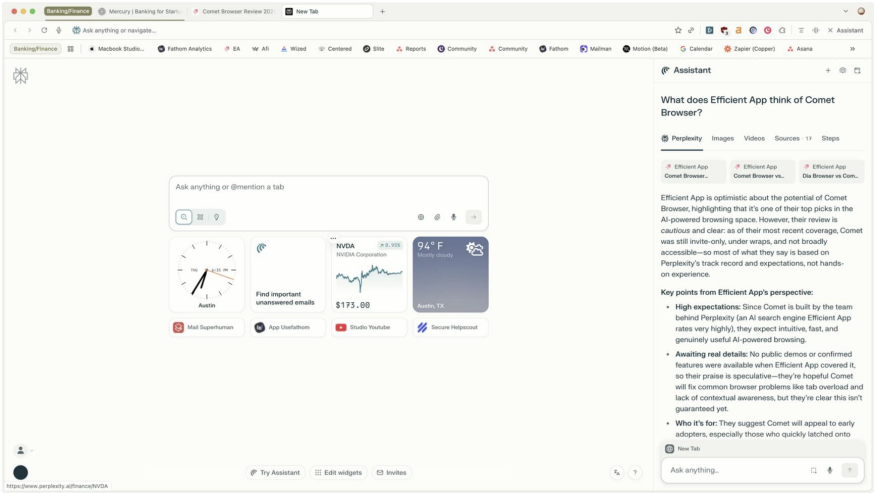

Enhancor

Make AI images look REALLY REAL

2. COMET BROWSER (BY PERPLEXITY)

AI Browser with embedded assistant, tasks, and workflows

Comet is the AI-first browser made by Perplexity.

You can use it to do a few nifty things.

"Having an AI-first browser is an absolute game-changer... I can't go back. My eyes would bleed. It's too slow."

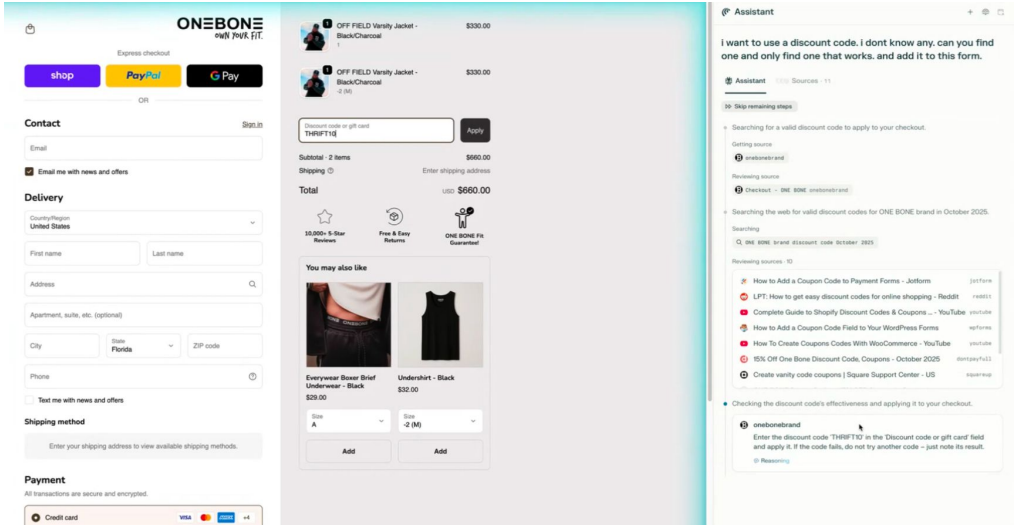

- Greg Isenberg

2. COMET BROWSER (BY PERPLEXITY)

Use Case 1
Find promo codes for shopping

Greg's Prompt

I want to use a discount code. I don't know any. Can you find one and only find one that works. and add it to this form.

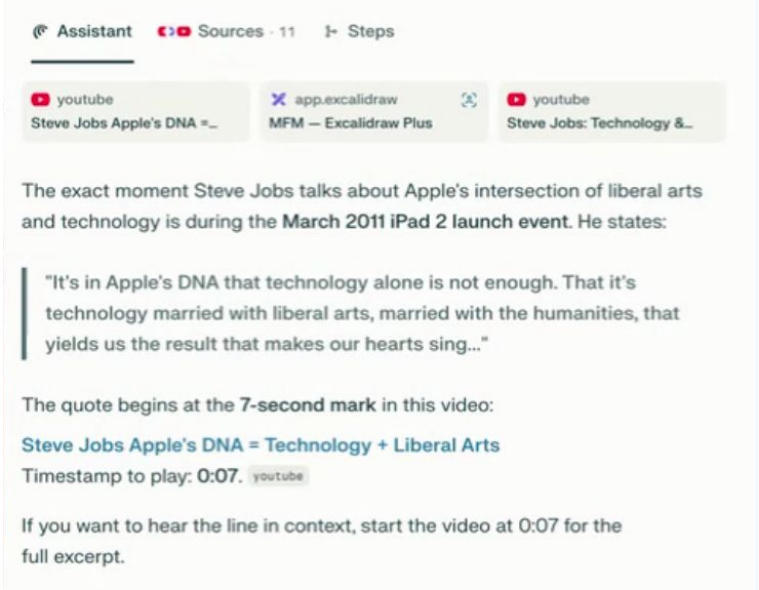

2. COMET BROWSER (BY PERPLEXITY)

Use Case 2
Locate exact moments in YouTube videos

Greg's Prompt

Find and play the exact moment Steve Jobs talks about Apple's intersection of liberal arts and technology.

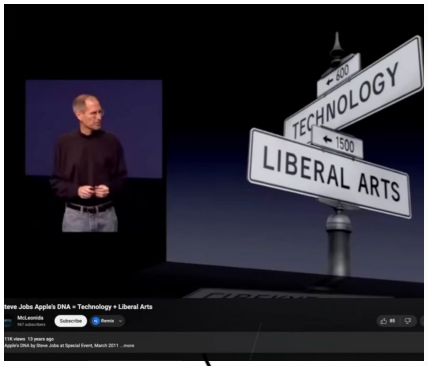

2. COMET BROWSER (BY PERPLEXITY)

Use Case 3
Learn from any YouTube video instantly

Greg's Prompt

This is a cool talk. I'm a founder. what are the most interesting takeaways for me? write it in an essay.

Assistant Sources · 1 Steps

youtube
Steve Jobs Apple's DNA =...

As a founder, Steve Jobs' talk "Apple's DNA = Technology + Liberal Arts" offers lessons that go far beyond product engineering—they are guiding principles on building something truly transformative. Here are the most relevant and thought-provoking takeaways:

Apple's Core Belief: Technology Alone Isn't Enough
Jobs repeats that it's "in Apple's DNA that technology alone is not enough." The magic emerges when technology is married to liberal arts and the humanities. This collision yields products that delight humans at a deeper level, inspiring emotional responses and creating not just utility but joy. For a founder, this means your edge isn't just technical superiority. Real innovation brings together technical skill and a profound understanding of human needs, culture, and beauty. Ask: what does your product make people feel, and how does it fit into their stories and aspirations? youtube

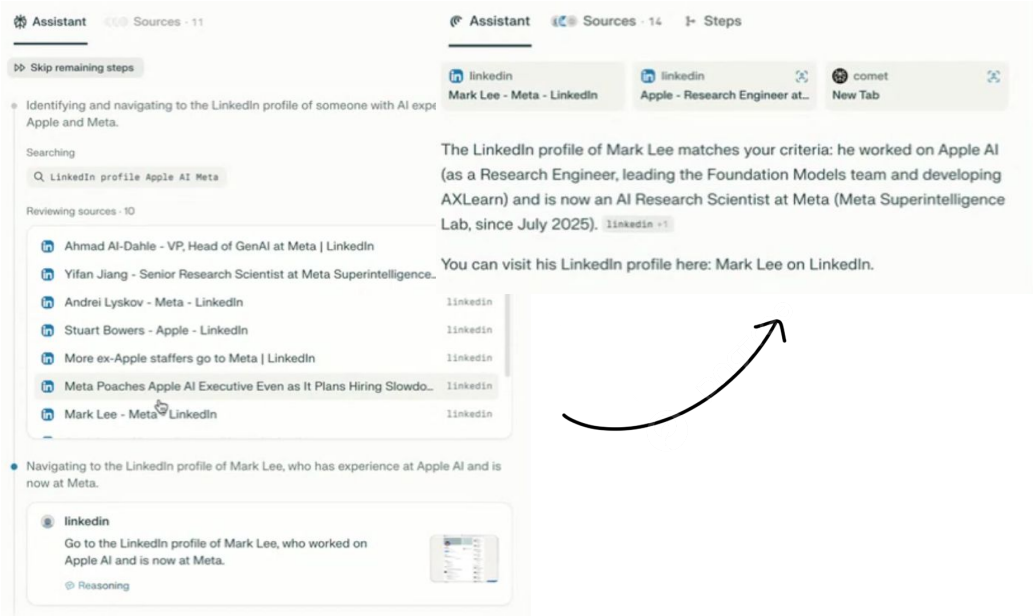

Integration Beats Modularity
He contrasts Apple's approach to competitors in the tablet market—most separate hardware and software between different companies and focus on specs ("speeds and feeds"). Apple, by contrast, creates post-PC devices that are "even easier to use," "more intuitive," and in which "software, hardware, and applications intertwine" in a seamless way. As a founder, consider whether deep integration—of product experience, brand, team, and tech—is key to delivering outsized value, rather than chasing feature checklists. youtube

2. COMET BROWSER (BY PERPLEXITY)

Use Case 4
LinkedIn power search

Greg's Prompt

Find and go to the Linkedin profile of someone who worked on Apple AI and now at Meta

2. COMET BROWSER (BY PERPLEXITY)

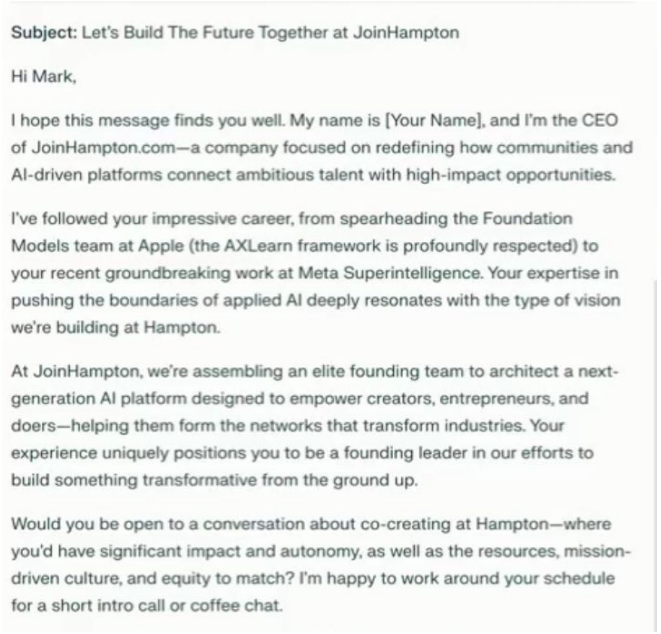

Use Case 4
LinkedIn power search → recruiting

Greg's Prompt

Find and go to the Linkedin profile of someone who worked on Apple AI and now at Meta

Can you craft an email that is going to get this guy to work for me (I'm the CEO of Hampton)

Subject: Let's Build The Future Together at JoinHampton

Hi Mark,

I hope this message finds you well. My name is [Your Name], and I'm the CEO of JoinHampton.com—a company focused on redefining how communities and AI-driven platforms connect ambitious talent with high-impact opportunities.

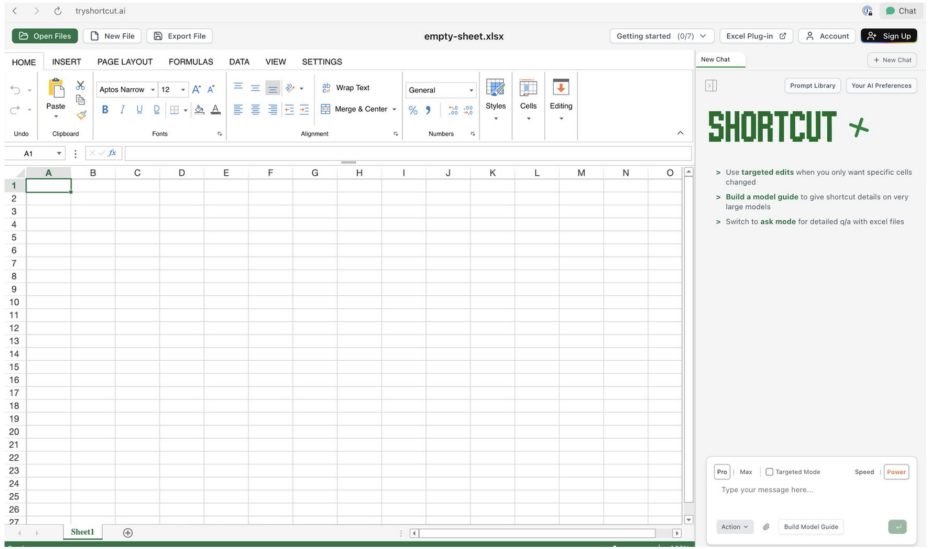

I've followed your impressive career, from spearheading the Foundation Models team at Apple (the AXLearn framework is profoundly respected) to your recent groundbreaking work at Meta Superintelligence. Your expertise in pushing the boundaries of applied AI deeply resonates with the type of vision we're building at Hampton.

At JoinHampton, we're assembling an elite founding team to architect a next-generation AI platform designed to empower creators, entrepreneurs, and doers—helping them form the networks that transform industries. Your experience uniquely positions you to be a founding leader in our efforts to build something transformative from the ground up.

Would you be open to a conversation about co-creating at Hampton—where you'd have significant impact and autonomy, as well as the resources, mission-driven culture, and equity to match? I'm happy to work around your schedule for a short intro call or coffee chat.

3. SHORTCUT AI

Have AI take over your spreadsheets

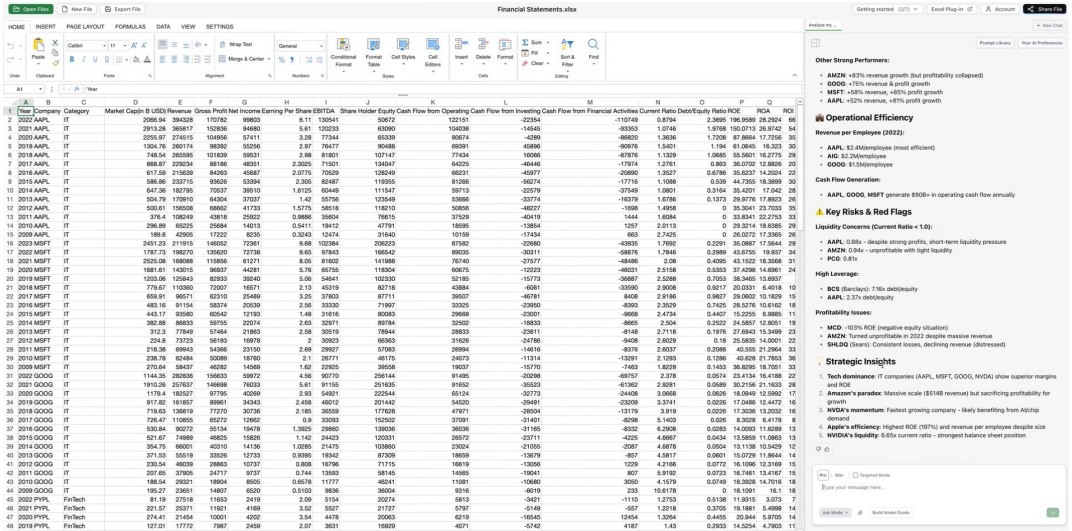

Shortcut AI is developed by a research lab as an AI-first version of Excel. You can use natural language to tell it what to do.

"This is basically a financial analyst in a box."

- Greg Isenberg

3. SHORTCUT AI

Have AI take over your spreadsheets

Step 1

Ask Comet to find you a sheet of company financial data you can use for Shortcut AI

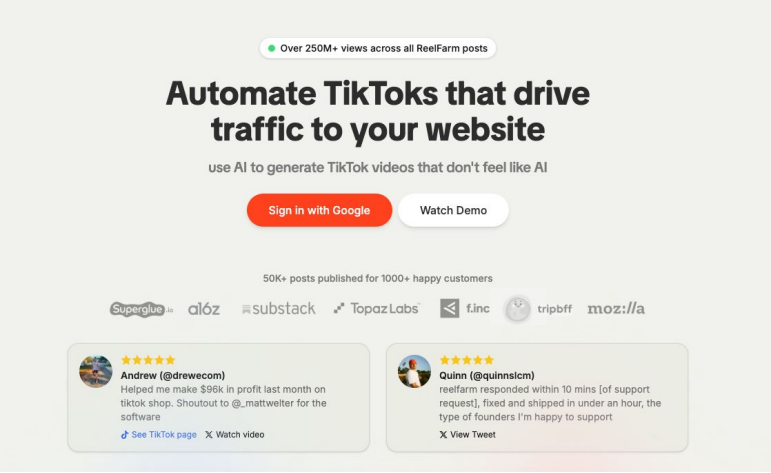

Step 2

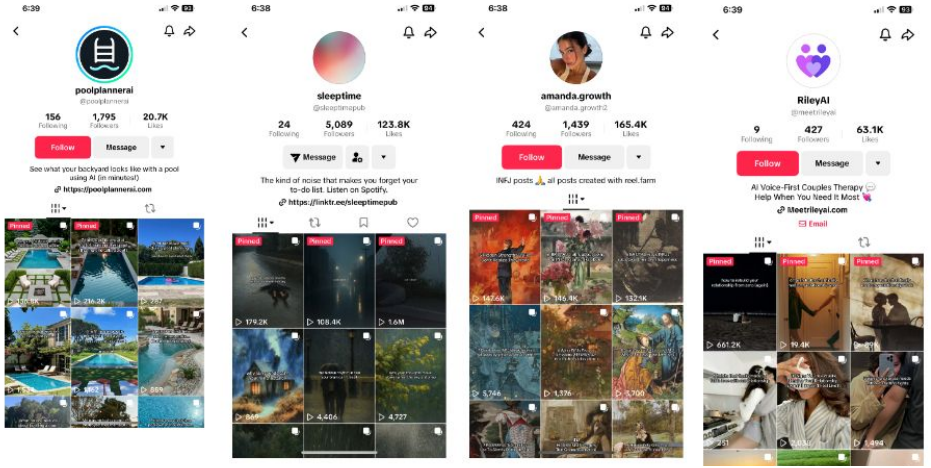

Ask Shortcut AI to:

- Build you an income statement
- Explain financial concepts
- “Which stock would warren buffet pick based on this data?”
- Create a new doc base on this sheet that shows operating cash flow
- …

4. REEL FARM

Content automation platform for organic short-form

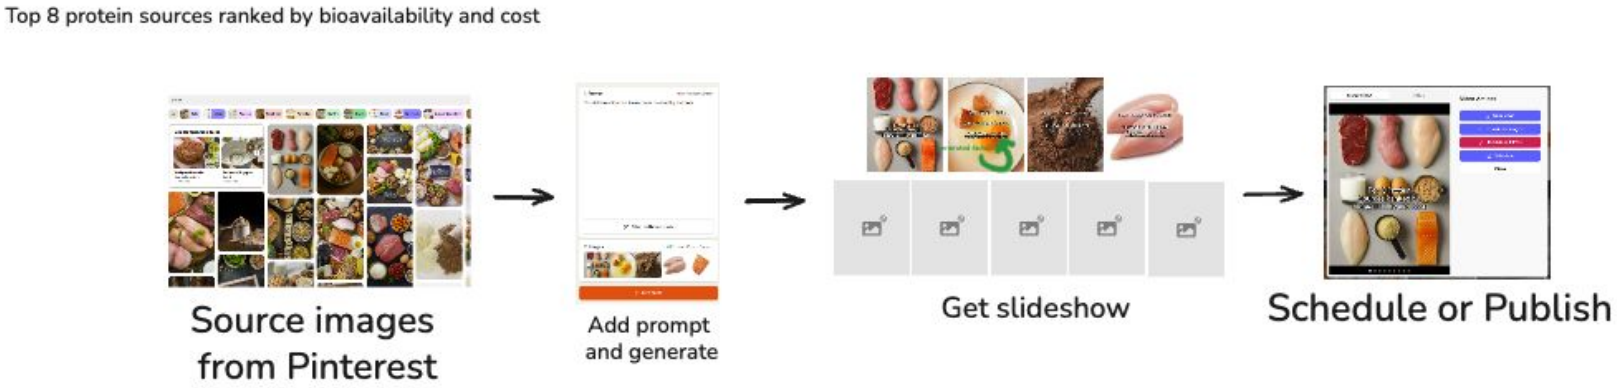

Reel Farm is a platform that automate TikTok video generation using AI to drive traffic to your website.

4. REEL FARM

Content automation platform for organic short-form

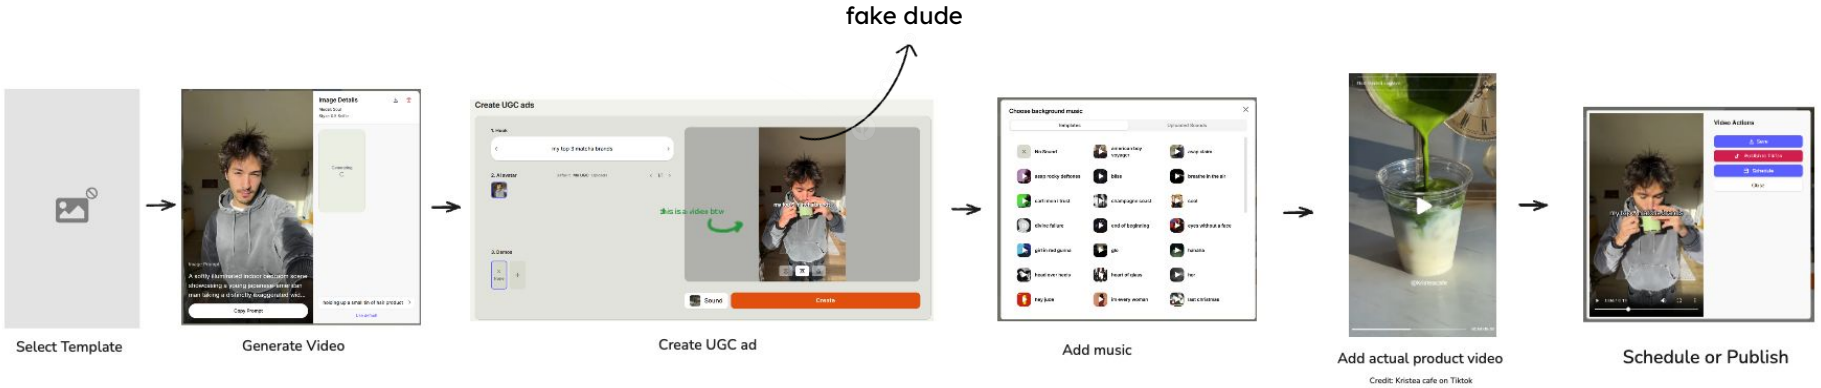

Use case 1
Creating slideshows

4. REEL FARM

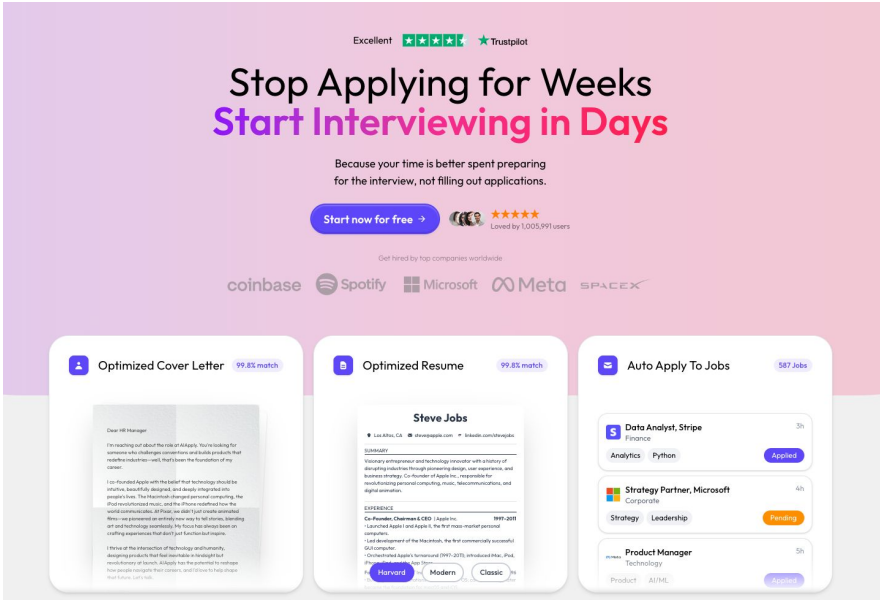

Content automation platform for organic short-form

Use case 2
UGC ad from AI avatars

5. AI APPLY

Apply to thousands of jobs automatically with AI

AI Apply is a job search tool that helps you automate applications via AI. It also has AI interview prep, resume builder and other functions.

"Any way that you can find an unfair advantage to get in the room, I support."

- Greg Isenberg

THE STARTUP IDEAS PODCAST

THE BOTTOM LINE

Greg didn't sugarcoat it. This guide is for people who want to use AI to their advantage.

You might hate some of these ideas. But this is where technology is going. These tools level the playing field.

The question is: are you going to use them, or are you going to keep doing things the hard way?

"I grew up with no connections and not a ton of money and stuff like that. So I have a soft spot for people who are starting out going zero to one."
